

JDE CNC Audit

**Do you have problem with your system performance and worried about your Go Live?
 Does your end-users complaining about your OneWorld / EnterpriseOne system Performance?
 Do you suffer from?**

- Slow Response Times
- Slow Screen Refresh Rates
- Slow Reports / Queries / UBEs
- Long Package Builds
- High CPU Utilization
- Etc.....

**We could help you with minimal risk!
 JDE CNC Performance Audit could be your only solution to your existing problem.**

JDE CNC Performance Audits are as follow:

- AS/400 / DB2
- Unix/Oracle
- Intel / SQL Server
- Intel / Oracle Server
- SQL Clusters
- WebSphere - * There would be a completely separate Audit
you could save with buying both a CNC and a WebSphere Audit!

You Will Not Pay a Penny if we don't find anything, Guaranteed!

FEATURES	BENIFITS
No Extra Cost to you - Guaranteed	ZERO Financial Risk
<ul style="list-style-type: none"> • Low Fixed Price for Most System Platforms 	<ul style="list-style-type: none"> • Easy Approval • Cost Effective • Minimum Risk
<ul style="list-style-type: none"> • All Work Done 100 % Remotely 	<ul style="list-style-type: none"> • Zero Travel Expenses • Can Start the Same Day
<ul style="list-style-type: none"> • Typically Done in 3-5 Days 	<ul style="list-style-type: none"> • Faster Results = better ROI
<ul style="list-style-type: none"> • Report Delivered typically within 2 business days after the audit is completed 	<ul style="list-style-type: none"> • Hard Copy Documentation
<ul style="list-style-type: none"> • Follow up Conference Call included to go over findings and recommendations 	<ul style="list-style-type: none"> • No Guessing at what we meant • Our Technical experts review each finding item by item with you and your team and go over the recommendations

Some Clients have seen up to a 50%-70% increase in performance by following just one or two of our recommendations!

* These Audits do NOT include application configuration setup issues or report setup issues which may also account for some of the performance issues. We would only take a snapshot of your configuration and not modifying anything at this point.

Depending on your configuration, we typically look at

- Connectivity setup (ODBC)
- AS400 TCP/IP Tuning
- Subsystem Tuning
- OCM and Data Source Mappings
- AS400 Cleanup Tasks
- Performance settings and Adjustments
- Indexes
- Log files
- Shared Memory Pools Configuration Management
- Pre-start Jobs
- System configuration (Hardware / Software)
- Log Files
- Disk Space / Utilization
- Database Setup
- Database Connectivity
- Database Maintenance Plans
- Disaster Recovery
- Indexes

AS/400 i-Series Configurations

AS/400 Components

- Database Connections
- TCP/IP Network Configuration
- EnterpriseOne Job Memory Pool
- Expert Cache
- AS/400 Performance Settings
- SQL Packages
- TCP/IP Network Configuration

JDE CNC Components

- OCM
- i-Series JDE.ini
- IFS setting and reports
- Database Data Sources
- Path codes
- Package Built and all the log files reports.
- Security and Task Roles.

SQL / Oracle DB & Intel Configurations

SQL / Oracle Components

- SQL / Oracle Database Setup and Configuration
- OneWorld / EnterpriseOne Databases
- Database Connections
- File Locations
- Indexes
- SQL / Oracle Performance Settings
- Disaster Recovery
- * Citrix Servers
- Clustered Servers (*Extra Fee)

JDE CNC Components

- OCM
- JDE.ini
- Database Data Sources
- Path codes
- Package Built and all the log files reports.
- Security and Task Roles
- And many more.
